REVIEW

for the educational programme of "Economics" of the Vinnytsia National Agrarian University, Ukraine

The level of higher education: first (Bachelor's study programme)
Specialty: 051 «Economics»
Branch of knowledge: 05 Social and behavioral sciences

Modern processes of modernization of the world economy and integration of more and more countries into the world economic space, transformational changes and civilizational shifts set the task of directing the educational process of future economists to understanding and studying the mechanisms of adaptation of domestic economic policy into globalization and integration processes in the world economy.

The level of knowledge and qualifications of economics specialists in the modern world increasingly depend on the flexibility of education system, investments into university development and scientific research, and international cooperation. Within the framework of the development of international collaboration, the educational program "Economics" of the Vinnytsia National Agrarian University was considered. This educational programme is focused on training a new generation of highly qualified specialists who will be able to work in accordance with the best world standards, preserving and creatively developing the best achievements of national and foreign economic science, in particular taking into account the sectoral characteristics of the agricultural industry.

It is necessary to note a deliberated balance of theoretical and applied economic disciplines, that contribute to a better understanding of the problems of the country's economic security, to the formation of new approaches to assessing current trends, to understanding the realities of the transformation of the national and global economy due to the combination of economic theory and business practice.

The forms and methods of teaching and learning used in the programme contribute to the achievement of the stated goals. Their choice corresponds to the student-centered approach and academic freedom of applicants and faculty involved in the programme.

The educational components of the program fully ensure the achievement of the programme learning outcomes. The list of the mandatory components is formed rationally and balanced according to the program profile. The elective disciplines deepen and develop the competencies of the bachelor’s students and realize their right for an individual trajectory.

The positive side is the system of practice formed in the programme, which makes it possible to bring training closer to production and management structures and contributes to the rapid conversion of the acquired knowledge into the formation professional potential of the future economist.
The preparing students on the first (bachelors) educational level in a frame of the educational programme "Economics" at the Vinnytsia National Agrarian University meets the current requirements of the society and economic development, the challenges of the competitive environment and the needs of employers in the labor market. The programme provides an opportunity for students to become a successful member of the domestic and international socio-economic community.

Dr. of Economics,
